

ESTABLISHED 2011

**G. A. S. LIMITED**

**GENUINE ARBITRATION SERVICE**

**MOSCOW**

Our main services are the representation of Russian and foreign companies in international commercial arbitrations either administered by permanent arbitration institutions (LCIA, ICC International Court of Arbitration, International Commercial Arbitration Court at the Russian Chamber of Commerce and Industry, Arbitration Institute of the SCC, VIAC, DIS, SIAC, HKIAC, CIETAC, ICDR, DIFC-LCIA, arbitrations under FOSFA or GAFTA arbitration rules, etc.) or conducted on an ad hoc basis (ad hoc arbitration).

The first arbitrations our lawyers participated in go back to as far as 2002. Since then they have accumulated priceless **experience** in representing clients as counsels in a wide variety of private law disputes referred to international arbitrations seated in Russia and abroad.

Our lawyers have acted as counsels of Russian and foreign companies in arbitrations against adversaries registered in Armenia, Brazil, the British Virgin Islands, Georgia, Israel, Iceland, Kazakhstan, Moldova, Singapore, US, Ukraine, Switzerland, Sweden as well as other jurisdictions.

We handle those arbitrations which conducted in either English or Russian and in which Russian, English or private international laws apply as substantive ones. At the same time, we benefit from a **wide network** of contacts in different jurisdictions across the globe which allows us to help clients even in those arbitrations wherein applicable substantive law is different from the aforementioned.

Affordable fees represent our undoubted competitive advantage on the market. They are **considerably below** the fees of many law firms specializing in the resolution of international commercial disputes. Another important benefit for our clients lies in the fact that we analyze the probability of success of a client's case without any payment obligations on the client's part, i.e. **free of charge**. The analysis, which we communicate to a client in writing, includes an assessment of success as a percentage and brief grounds for such a conclusion.

Being not a large company, we are focused on providing high-quality specialized services for a **reasonable price**. We strive to find financial solutions benefiting both clients and lawyers which take into account the financial capacity of our clients.

[ international arbitration  
practice since 2002 ]

Alongside the representation of clients in international commercial arbitrations we also provide legal services on the **recognition** of arbitral awards in those states where the award-debtors are registered or where their assets are located. Most frequently, the recognition proceedings are based on one of the most successful international legal instruments – the UN Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 1958).

We also render legal services in **set aside proceedings** handled by competent national authorities (courts), i.e. in those where a party dissatisfied with an arbitral award challenges the latter. Although as a general rule (which, of course, is not absolute and which requires taking into account national/domestic laws of the state where the challenge is sought) such a challenge can be admitted on limited grounds, it is a rare case when an dissatisfied party does not have recourse to the set aside proceedings.

Apart from the above, if a client so requires we organise and control the **enforcement** of arbitral award proceedings in those states where the debtor's assets are located.

As a general rule, we provide legal services in proceedings on recognition, challenge and enforcement of international arbitral awards (if these proceedings are conducted outside Russia) in cooperation with local consultants, for the courts procedural and enforcement particularities existing in the respective jurisdictions should be heeded to.

At the request of our clients we organize as well a **search of the debtor's assets** in a wide range of foreign jurisdictions involving for these purposes trusted partners. Such a search can be of real use, particularly, while deciding whether arbitral proceeding against a debtor should be initiated and expenses associated therewith should be incurred, given the likelihood of the enforcement of a prospective award.

The benefits of extensive experience in international commercial arbitrations with application of international private law and/or the laws of different jurisdictions expand also our abilities to provide clients with **effective consultancy support** at the stage of drafting and negotiating international commercial contracts.
